## Application Version Compatibility with ProjectWise V8i Releases Ver 5.03

### Notes:

1. The integration provided for AutoCAD-based AutoCAD verticals is the same as that provided for base AutoCAD; ProjectWise does not provide integration for the additional tools and commands unique to each vertical.
2. Microsoft Office 2010 integration is available for ProjectWise V8i (SELECTseries 3) and requires the installation of the ProjectWise V8i (SELECTseries 3) Integration Module for 32-bit Microsoft Office 2010 module. Microsoft Office 2010 is not supported by earlier versions (pre SS3) of ProjectWise.
3. Contact TSG to use the Bentley Geospatial Management V8i (SELECTseries 2) with ProjectWise Integration Server V8i (SELECTseries 3), a small patch must be applied to the Administrator client.
4. Speedikon AutoCAD 2010 products cannot be integrated with ProjectWise.
5. Bentley Navigator V8i (SELECTseries 3) and Bentley i-model Composer V8i (SELECTseries 3) will only support integration with ProjectWise Explorer V8i (SELECTseries 3), regardless of whether the Integration Server is SELECTseries 2 or 3. Bentley Navigator V8i (SELECTseries 3) and Bentley i-model Composer V8i (SELECTseries 3) integration with ProjectWise Explorer V8i (SELECTseries 2) is NOT a supported configuration. If you still chose to work with this configuration, Bentley has done some cursory testing and has noted the following issues. Bentley i-model Composer: (1) Bentley i-model Composer does not display in the list of program associations (2) Need to check "open as read only" when opening files or the file will be checked out, (3) The application association is not defined when publishing an i-model. Bentley Navigator: (1) Right click markup from ProjectWise Explorer does not launch Navigator, (2) Newly created overlay files need to be checked in after being created
6. ArcMap and MapInfo integration require the appropriate Bentley ProjectWise Geospatial Management Server. (see readme)
7. For AutoCAD 2012 support within PW SS3, The ProjectWise Integration Module for AutoCAD 2012 is required.
8. Support for Civil 3D 2010 running on a 64-bit operating system requires the ProjectWise V8i (SELECTseries 3) Integration Module for 32-bit Civil 3D 2010 for 64-bit Operating Systems.
9. For Revit 2013 support within PW SS4, The ProjectWise Integration Module for Revit 2013 is required.
10. PW Client SS4 is must however PW Server can be PW SS3 or PW SS4.
11. Supported with a registry workaround specific to the version, provided by PW team.
12. For AutoCAD 2013 support within PW SS4, The ProjectWise Integration Module for AutoCAD 2013 is required.
13. For Microsoft Office 2010 64-bit support within PW SS4, The ProjectWise Integration Module for Microsoft Office 2010 64-bit is required.
14. Includes support for the versions of these products included in the AutoDesk Suite of products.
15. For Civil 3D 2012 - 2013 support within PW SS4, The ProjectWise Civile 3D advanced integration module is required.
